- **Editorial**
- **Original Article**
- **Review Articles**
- **Short Communication**
- **Case Reports**
- **Letter to the Editor**

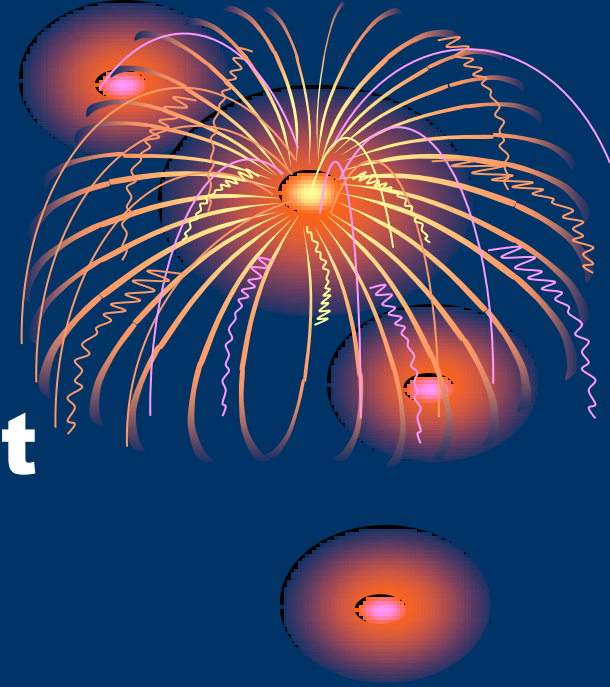

The Basic Structure of Article

- ✓ **TITLE**
- ✓ **Authors and Affiliation**
- ✓ **Abstract**
- ✓ **Keywords**
- ✓ **Introduction**
- ✓ **Methods**
- ✓ **Results**
- ✓ **Discussion**
- ✓ **Conclusion**
- ✓ **Acknowledgements**
- ✓ **References**

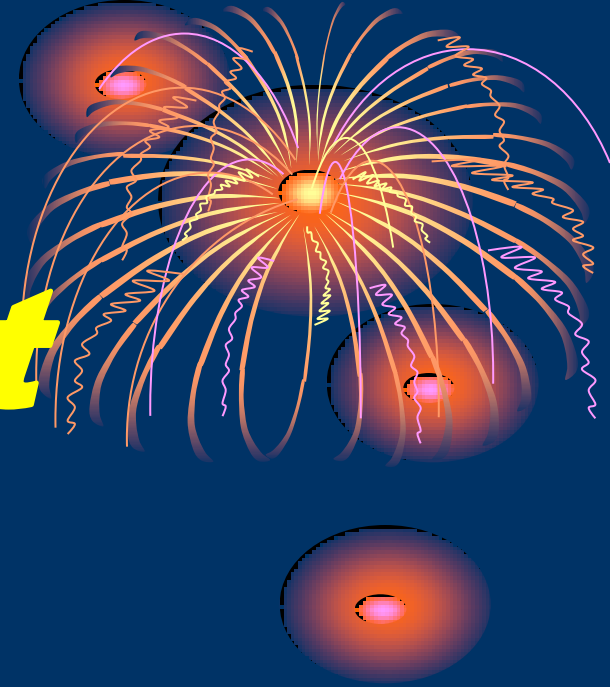

Title

- **Should be specific But comprehensive**
- **Short But sufficiently descriptive**
- **No abbreviations**
- **Should be easy To catalogue**

Abstract

- ✓ Background
- ✓ Methods
- ✓ Results
- ✓ Conclusions
- ✓ Key words

Keywords

The background is a dark blue gradient. In the top right corner, there are colorful fireworks exploding in shades of purple, orange, and yellow. A large, stylized white scroll-like shape is positioned in the top right, partially overlapping the fireworks. A vertical orange scroll-like shape is on the left side of the page, framing the central text area.

Search as text words in Annotation & Scope Note

Introduction

- ✓ Existing state of knowledge
- ✓ Gaps in knowledge which research will fill.
- ✓ State what you Intend to do

Note

Do not Review the history of the subject

Don not include methods, results and discussion

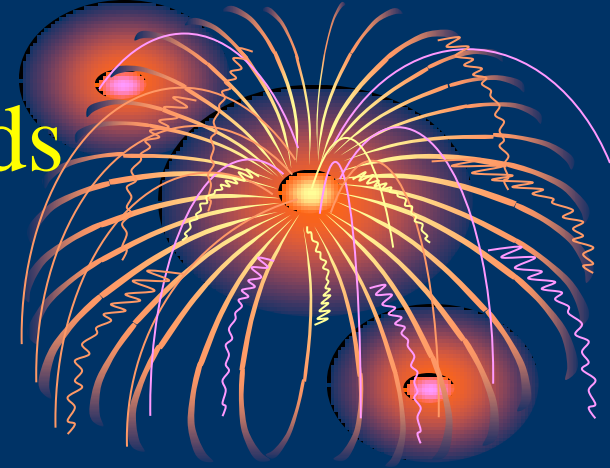

Materials and Methods

- **What Subjects/patients/animals/specimens techniques were used?**
 - **Reason for selecting the experimental design of the study**
 - **Statistical methods used for analysis**
 - **The section should be called "Material and Methods" only if inanimate specimens have been used (Otherwise should say Patients and Methods).**
- 

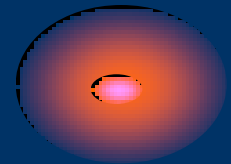

Materials and Methods

cont...

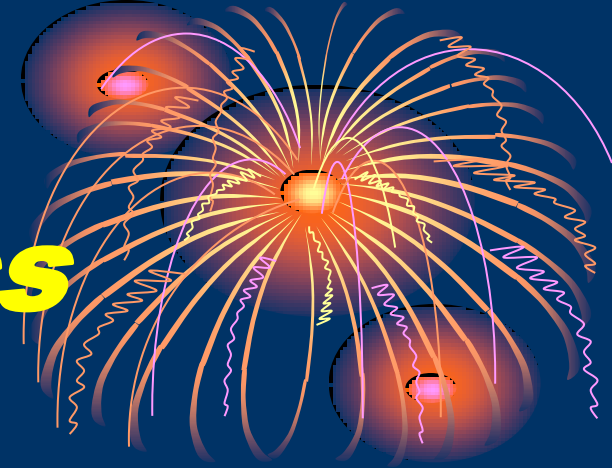

Patient / Animals / Specimens

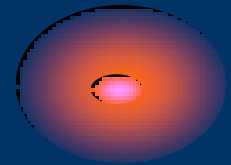

- Numbers
- How are they grouped
- (cases /controls)
- Criteria
- Informed consent obtained

Statistics

Clearly mention the statistical methods used for appropriate verification of reported results.

Results

- ✓ **Communication of facts, measurements, and observations gathered by the author**
- ✓ **Results should be set out in tables and figures**
- ✓ **Do not duplicate data**
- ✓ **Do not mention any reference and interpretation**

Original sentence:

Iron concentration means (\pm standard deviation) were as follows: 11.2 ± 0.3 mg/dm³ in sample A, 12.3 ± 0.2 mg/dm³ in sample B, and 11.4 ± 0.9 mg/dm³ in sample C.

Modified:

Iron concentration means (\pm standard deviation, in mg/dm³) were as follows:

sample B	12.3 ± 0.2
sample C	11.4 ± 0.9
sample A	11.2 ± 0.3

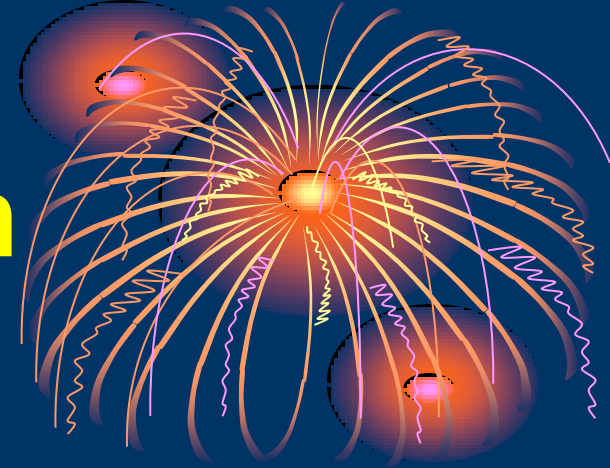

Discussion

- ✓ **Main results should be summarised at the beginning of discussion**
- ✓ **Only mention previous results or comments which illuminate or which are illuminated by the present results.**

(continue)

Discussion

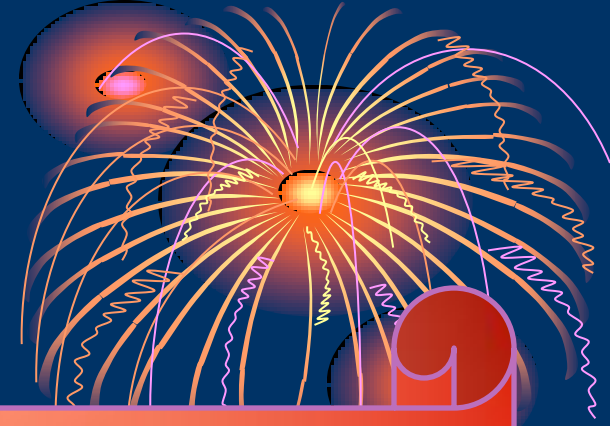

- **Final paragraph in which the message of the article is firmly stated.**
- **Point out where further gaps in knowledge could usefully be filled instead of "further research is needed".**

Acknowledgements (Silent partners)

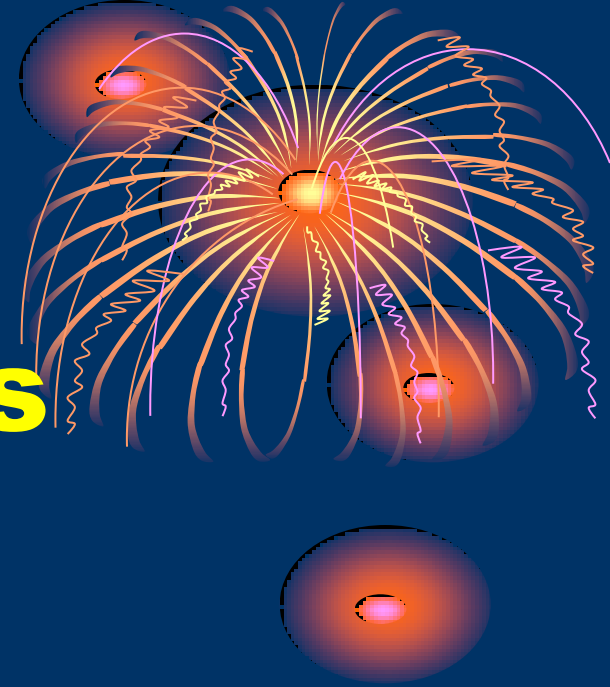

➤ **“We wish to thank” - all those who deserve recognition for their contribution but who have not made a significant intellectual contribution and are therefore not included as authors (Colleagues, Institutions, Organizations providing financial help, laboratory and secretarial staff)**

State the source of financial support

References

References

- **1- Harvard format (Writer/year).**
- **2- Vancouver format (number).**

- **End Note program**

Harvard format

- نام نویسنده و سال ارائه مقاله نوشته می شود.
- رفرنس ها به ترتیب حروف الفبا نوشته میشود.
- حذف یک رفرنس بر راحتی امکان پذیر است.
- نیاز به مراجعه به رفرنس ها برای مقایسه سال مطالعه ها نیست و خواننده راحت تر موضوع را هضم میکند.
- نوشتن مقاله مشکل تر است.

Vancouver format

- شماره رفرنس ها بترتیب ورود در متن نوشته می شود.
- حذف یک رفرنس مشکل ساز است و ووقت زیادی را میگیرد.
- بخش رفرنس الفبایی نیست و رفرنس بترتیب ورود در متن گنجانده میشوند.

THE SEARCH FUNCTION HAS BEEN REPAIRED. PLEASE NOTIFY US IF YOU HAVE ANY PROBLEMS.

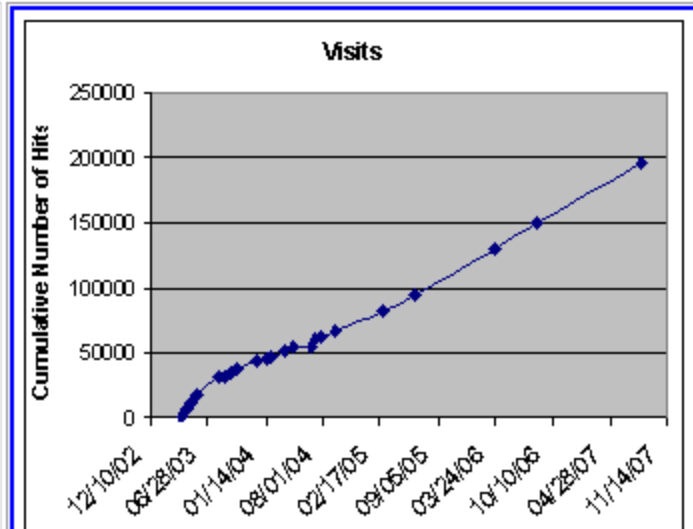

These pages contain the abbreviations, full titles, and links to some WWW pages for a large variety of biological and medical journals. This list is by no means complete or authoritative. If you are aware of a journal that is not included in this list, please let me know by sending an email to gwpatt01@yahoo.com that contains the Journal's full title, an accepted abbreviation, the city of publication, and the address of an existing website hosting an online version of journal or information about the journal.

درباره مرکز

به **مرکز بین المللی ثبت کارآزمایی های بالینی ایران** خوش آمدید. این مرکز با حمایت معاونت تحقیقات و فناوری وزارت بهداشت ، درمان و آموزش پزشکی و با میزبانی دانشگاه علوم پزشکی تهران راه اندازی شده و مورد تایید سازمان بهداشت جهانی است.

ثبت کارآزمایی های بالینی با هدف :

- اطلاع رسانی در مورد کارآزمایی های بالینی کشور .
- هماهنگ شدن فرآیند ثبت کار آزمایی های بالینی با استانداردهای بین المللی .
- آموزش عمومی در زمینه مطالعات کارآزمایی بالینی و اهمیت آن بوجود آمده است .

**How do I find my lat and long ?
What is my latitude and longitude ?**

Latitude and Longitude

Your eye in the sky...
Do you want to take a look at your facilities from above? Fast & Easy?

GeoERP
Leading GIS-ERP turnkey solutions for lands, roads and infrastructure

Ads by Google

Instructions to determine your latitude and longitude:

Practice first. Put your mouse cursor near your location and **double click or just drag the map**. The map display will move so that the selected point is in the **centre**. The latitude and longitude of the centre of the map is then shown below the map. Or type the town, country, zip code or post code in the box below, for example: chicago 35035 paris france london CM2 bangalore adelaide lagos liverpool

Centre the map around

To refine the accuracy of your site latitude and longitude, click on the plus sign in the navigation boxes at the upper left side of the map. The scale will change so that you can home in accurately on your location. Repeat. Choose the **Satellite** or **Hybrid** map version to see the satellite photo image of the ground. You may left click your mouse and drag the satellite map.

Next step: If you want satellite dish pointing, select the satellite at the lower left pull down menu box and click the map again (to recalculate the pointing angles)

Ads by Google [Latitude](#) [GPS Finder](#) [Bank Finder](#) [Range Finder](#) [Lat Lon](#)

Latitude is North - South (up and down !). Longitude is West - East (sideways !). Latitude is zero on the equator and positive in the northern hemisphere and negative in the southern hemisphere. Longitude is zero on the [prime meridian - home of Greenwich Mean Time](#) and is positive to the east, across Europe and Asia. Longitude is negative to the west, across the Atlantic and the Americas. Read about the [history of latitude and longitude](#). Further [explanation](#) of latitude and Longitude from National Atlas (USA)

Write down your lat/long location co-ordinates for future reference.
Try comparing with your [sat-nav GPS](#) navigator tracker receiver position ?

27th April 2006: GPS sat-nav map type display is now added. The whole map system has been upgraded to Version 2 which now includes detailed [street maps for UK](#), France, Spain and Europe road maps with towns - even in Hungary, which suits me for my cycling holidays!. 6th June 2006: I have added satellite dish angle calculation. Its use is optional. Select the satellite you want to see and then doubleclick on the map.

Go to [maps](#) to see an index page with a listing of all the map pages. Tell me if you want a page made for your location.

Latitude = 32.4279, Longitude = **53.6880**
 Lat = 32 degrees, 25.7 minutes North
 Long = 53 degrees, 41.3 minutes East

If you want to point a satellite TV dish at Satellite= 13 East orbit longitude

Beam elevation= 32.5, Azimuth= 234.5 (magnetic compass), Polarisation= 45.7

(Optional) Pointing angles to satellite orbit longitude

Blue direction line ? Off On
 Extra decimal places * ? No Yes

Ignore the satellite pointing angles until you are familiar with finding your latitude longitude location. If you want dish pointing select the satellite and click the map afterwards. Possible problems with this page: Do page refresh if you do not see 6 square navigation boxes (north/south/west/east navigation and +/- on the left and 3 rectangular boxes at the top of the map. Firefox: If you get a "Warning-Unresponsive Script", click "Continue". It is OK and will take just a few more seconds to complete loading the map. If it takes ages to load check your browser

The present research was conducted in autumn 1381

نوشتن سال شمسی به همان صورت در متون انگلیسی .

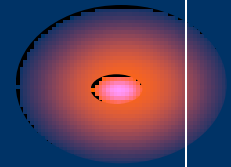

تبدیل سال شمسی به میلادی

دو رقم آخر سال شمسی + 21 = سال میلادی . مثلاً در مورد فوق ، سال 1381 با جمع دو رقم آخر یعنی 81 به اضافه 21 به 2002 میلادی تبدیل میگردد . توجه شود که چنانچه تاریخی از 10 دی به بعد باشد باید دو رقم آخر را با عدد 22 جمع نمود زیرا تاریخ مصادف با اول ژانویه می باشد.

The identified agent was salmonella,

The identified agent was *Salmonella*.....

- اصولاً اسامی جنس ها باید با حرف بزرگ شروع شده و ایتالیک نوشته شود. این گونه اشتباه بکرات در مقالات مشاهده میگردد .

A decorative scroll with Persian text is set against a dark blue background. The scroll is white with a purple border and a purple shadow. The text is in orange Persian script. In the top right corner, there are colorful fireworks exploding, with orange, yellow, and purple streaks. The scroll has a traditional Persian scroll design with a loop at the top left and a tail at the bottom left.

نکته بسیار مهم:

حتما بعد از هر نقطه، کاما، سمي کولون و
غيره بايد يك فاصله باشد. اين مسئله بسيار
مهم است و در مقالات اكثر نويسندگان تازه
کار متاسفانه رعايت نميشود.

Stylesheet for Humanities Papers

Introduction

Paper writing has its own conventions. It is as well to learn these now as to need to correct bad habits later. The style I recommend is that outlined in Kate L. Turabian, *A Manual for Writers of Term Papers, Theses, and Dissertations*, 6th ed. (Chicago: University of Chicago Press, 1996).

Typing and Presentation

Papers must be typed, double-spaced, on standard 8 1/2"x 11" paper. Use 1 inch margins all round. Use 10 or 12 pt. type. If using a wordprocessor, do not use right-hand justification as it leads to oddly spaced words. Do not use erasable paper. **Staple the paper in the top left-hand corner.** Do not use plastic covers or binders. Keep a copy other than the one you submit (professors' cars have been stolen before now).

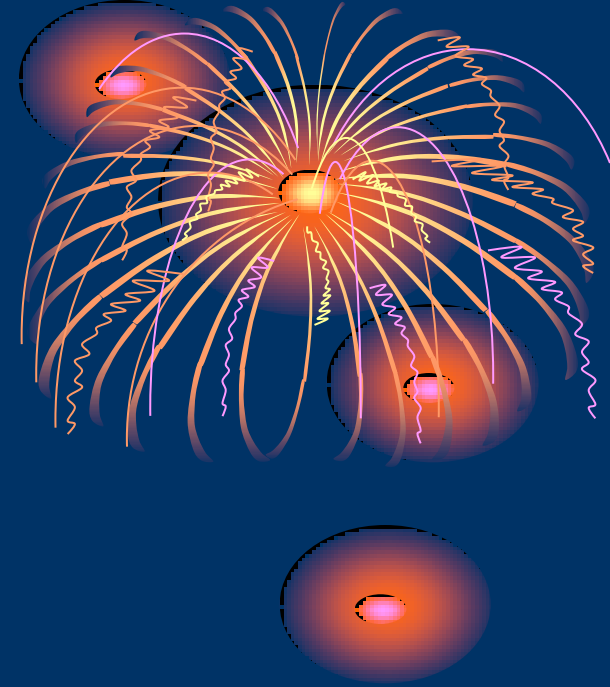

Text should be double spaced (unlike in this handout). Long quotations, however, should be single spaced and indented five spaces. There is always at least one space after a period. In typing it is customary to leave two spaces.

The paper should be written in paragraphs. The first line of each paragraph should be indented five spaces (one standard tab). Sub-headings (as in this handout) may be used, but are not considered good style by many. There is no gap between paragraphs.

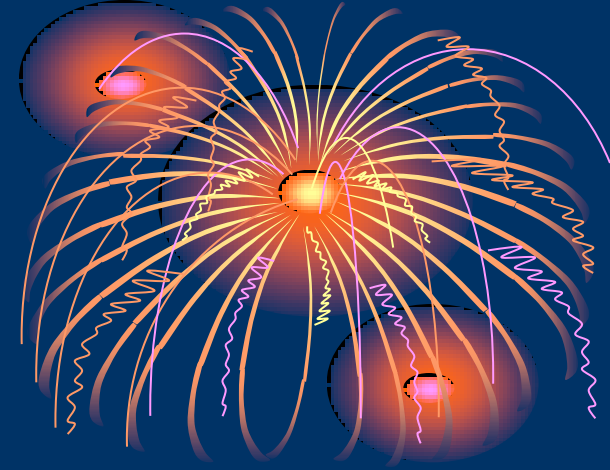

Title Page

The following information should be included on the title (front) page of all papers.

- Your name
- The course name and number
- The lecturer's name (Paul Halsall)

<http://www.fordham.edu/halsall/med/style.html>
